

Investment Opportunities Know No Borders

Global Growth is designed to help investors build capital over time primarily through investments in companies in the U.S. and developed countries demonstrating compelling growth potential.

Data presented reflect past performance of Investor Class shares. Past performance is no guarantee of future results. Current performance may be higher or lower than the performance shown. To obtain performance data current to the most recent month end, please visit americancentury.com. Investment return and fund share value will fluctuate, and redemption value may be more or less than original cost. Data assume reinvestment of dividends and capital gains. For information about other share classes available, please consult the prospectus. There is no guarantee the fund will meet its investment objective.

Broad investment universe

Global investing opens the door to some of the world's most successful businesses. Global leaders in many industries are found outside of the U.S., thriving in an integrated world economy. The Global Growth team scours the world, seeking the most attractive investment opportunities with a focus on developed countries.

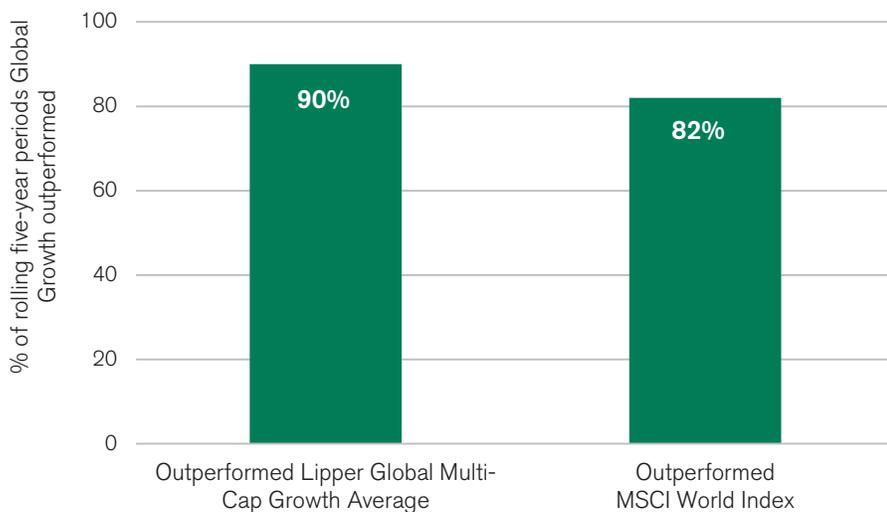

Proven investment process

The managers seek to identify companies in the earliest stages of accelerating fundamental improvement, particularly those whose growth they believe may be sustained by such catalysts as a new product, a technological breakthrough or a business model offering global scale and growth potential. The portfolio is built with attention to the risk being taken compared to the return potential.

Consistent outperformance

Global Growth's track record reflects its disciplined, risk-aware approach. Through a wide range of economic and market conditions since its 1998 inception, the fund has outperformed the average of its Lipper Global Multi-Cap Growth peers in 90% of rolling 5-year periods. During the same stretch it outperformed the MSCI World Index in 82% of rolling 5-year periods.

Global Growth has consistently outperformed its peers and benchmark on a rolling 5-year basis since inception

Monthly observations of trailing five-year returns since inception on 12/1/1998. Updated 05/31/2017. Sources: American Century, Lipper, MSCI.

The Lipper Global Multi-Cap Growth peer group average and MSCI World Index are not investment products available for purchase.

You should consider the fund's investment objectives, risks, and charges and expenses carefully before you invest. The fund's prospectus or summary prospectus, which can be obtained at americancentury.com, contains this and other information about the fund, and should be read carefully before investing.

Mutual fund investing involves market risk. Investment return and fund share value will fluctuate and it is possible to lose money by investing. There is no guarantee the investment objectives will be met.

The information is not intended as a personalized recommendation or fiduciary advice and should not be relied upon for investment, accounting, legal or tax advice.

Equity investments are subject to market fluctuations.

International investing involves special risk considerations, including economic and political conditions, inflation rates and currency fluctuations. Investing in emerging markets may accentuate these risks.

The MSCI World Index represents the performance of stocks in developed market countries (including the U.S.) available for purchase by global investors. Source: MSCI. MSCI makes no express or implied warranties or representations and shall have no liability whatsoever with respect to any MSCI data contained herein. The MSCI data may not be further redistributed or used to create indices or financial products. This report is not approved or produced by MSCI. The Lipper category average reflects the average performance of Global Multi-Cap Growth funds tracked by Lipper, a Reuters company.
