

Ultra® Fund

A Smart Approach to Growth Investing

Ultra is a risk-aware large growth fund that seeks to deliver consistent results over time through investments in high-quality companies with long-term growth potential.

Data presented reflect past performance of Investor Class shares. Past performance is no guarantee of future results. Current performance may be higher or lower than the performance shown. To obtain performance data current to the most recent month end, please visit americancentury.com. Investment return and fund share value will fluctuate, and redemption value may be more or less than original cost. Data assume reinvestment of dividends and capital gains. For information about other share classes available, please consult the prospectus. There is no guarantee the fund will meet its investment objective.

Focus on long-term growth

Good stocks start with good businesses. The team seeks highly profitable companies with an ability to compound shareholder capital at high growth rates. The team invests when fundamentals are at a positive inflection point by focusing on:

- Improving metrics of fundamental growth
- Relative price strength
- Valuation

Team with unique insights

Ultra uses a team-based approach to managing money. This team of dedicated stock pickers includes individuals with direct experience in the industries they cover. This approach and diverse team:

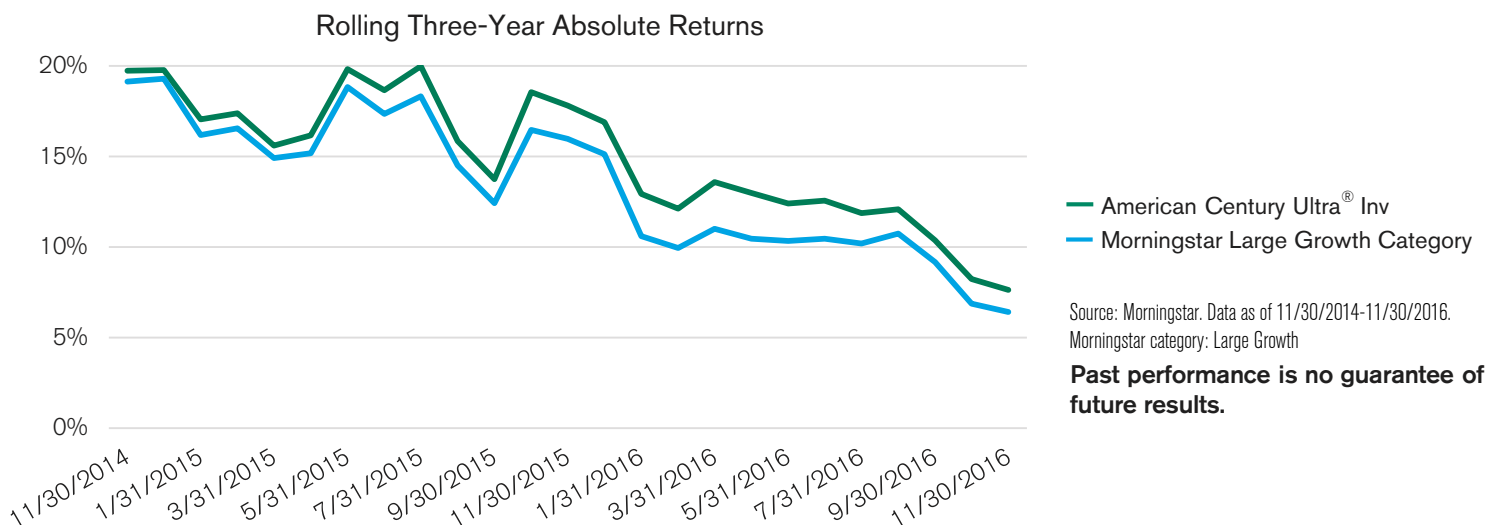

- Provides access to unique insights from former practitioners
- Leads to stability in execution of investment process

Risk-managed performance

Risky funds can result in volatile returns. The Ultra team's risk controls have historically reduced big performance swings. The team strives for performance consistency by:

- Employing strict risk controls
- Maintaining style purity
- Generating consistent risk-adjusted returns

Ultra has historically outperformed the peer average

Growth of a hypothetical \$10,000 investment

You should consider the fund’s investment objectives, risks, and charges and expenses carefully before you invest. The fund’s prospectus or summary prospectus, which can be obtained at americancentury.com, contains this and other information about the fund, and should be read carefully before investing.

The Russell 1000® Index measures the performance of the 1,000 largest companies in the Russell 3000® Index (the 3,000 largest publicly traded U.S. companies based on total market capitalization). The Russell 1000® Growth Index measures the performance of those Russell 1000® companies with higher price-to-book ratios and higher forecasted growth values. Created by Frank Russell Company, indices are not investment products available for purchase.

The Average of Morningstar Large-Cap Growth Category is an average of all the funds in this category. It is not an investment product available for purchase. ©2017 Morningstar, Inc. All Rights Reserved. Certain information contained herein: (1) is proprietary to Morningstar and/or its content providers; (2) may not be copied or distributed; and (3) is not warranted to be accurate, complete or timely. Mutual fund investing involves market risk. Investment return and fund share value will fluctuate and it is possible to lose money by investing. Equity investments are subject to market fluctuations.

The fund also may invest in foreign securities, which can be riskier than investing in U.S. securities. Investments in growth stocks may involve special risks and their prices may fluctuate more dramatically than the overall stock market. If at any time the market is not favoring the fund’s growth investment style, the fund’s gains may not be as big as, or its losses may be bigger than, those of other equity funds using different investment styles.
